OVER ONE THOUSAND HOUSES REPAIRED

Three months after the passage of Hurricane Beryl, Government continues to implement an ambitious programme of housing repair and reconstruction throughout the country.

According to a report from the Ministry of Housing, as of September 30, one thousand, one hundred and sixteen (1, 116) houses which sustained level 1 and 2 damage have been repaired through the Ministry of Housing.

This has been done either directly by the Ministry or through “self-help”, where some homeowners opted to receive materials and or labour through the Ministry. For those homeowners who decided on the “self-help” approach, the Ministry assigned assessors to make periodic checks and ensure that repairs were done following specific building codes and guidelines.

Houses which fall under level 1 and 2 categories are those homes which received damage mainly to their roofs, where the entire roof was destroyed or part of the roof.
