PUBLIC SERVICE ANNOUNCEMENT

Hopewell/Maroon Hill Road Rehabilitation Project

The Ministry of Transport, Works, Lands and Physical Planning wishes to advise the public that as part of ongoing works on the Hopewell/Maroon Hill Road Rehabilitation Project, cutting of the upper embankment is being carried out on sections between Hopewell and the Cotton Ground Junction.

Due to the variable nature of the material present in the upper embankment and its steepness, some landslides have occurred, causing closure of the road at various intervals during the past three months.

In light of the upcoming rainy season, additional land slippage is likely to occur both from weather events and construction works. To ensure public safety, be advised that further road closures cannot be avoided. The Ministry will endeavour to implement engineering and traffic interventions that will keep the road open as long as possible.

The Ministry is therefore advising road users who traverse the Mesopotamia /Greiggs road to use alternative routes in the interim. The Ministry of Transport, Works, etc. sincerely regrets any inconvenience caused.
