### **Work Progressing Steadily on Bonhomme Road Project**

Construction on the Bonhomme Road Project continues to advance steadily, with significant milestones already achieved as work moves closer to completion.

To date, approximately 860 metres of concrete paving has been completed. Additionally, 100 percent of retaining walls have been constructed, providing critical support and stability along the roadway. Drainage infrastructure is also progressing well, with 50 percent of drainage works completed, while 70 percent of culvert installations have been finalized.

The project remains a key infrastructure initiative aimed at improving road safety, enhancing connectivity, and increasing resilience to adverse weather conditions.

Plans are also in place for the construction of a roundabout at the intersection, which will serve as a vital traffic link. This roundabout is expected to improve the flow of vehicles traveling from Mesopotamia, Victoria Village, and Carapan, and connecting back to the main intersection at Calder.
